

YOUR WRITTEN MEDICINE INFORMATION IS IMPORTANT!

The print-out you get with your prescription medicine contains useful information to help you get the best results and avoid problems. Take time to read it carefully. If you're not sure about what you've read, ask your healthcare professionals about:

- Instructions for use, including how and when to take your medicine—and for how long;
- Precautions, including what medicines to avoid, including other prescription and nonprescription medicines;
- Side effects—and what to do if they occur;
- What to do if you think you are having a problem caused by the medicine.

Your Medicine Information...
READ IT and HEED IT
